

Reliable ARC Monitoring with Exclusive Dual Path Connectivity

Communicating to your chosen ARC has never been simpler.

Using any Orisec control panel* with a CM2 module combined with CSL's Critical Connectivity platform will provide full ARC communications, access to Orisec's Control Plus and Control Plus 2 (Coming Soon) end user applications, along with many other benefits.

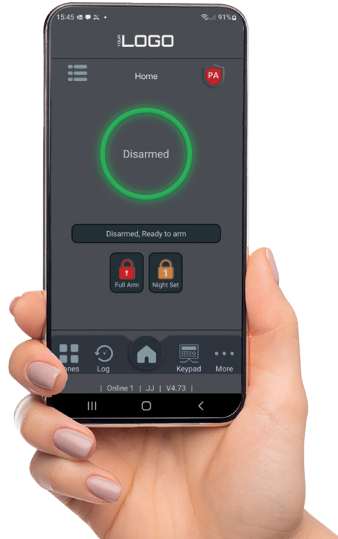

* Listed in the below table

Key Features

- Simple Integration
- Reliable ARC Monitoring
- Exclusive Dual Path Connectivity
- Available across complete Orisec Panel Range*
 - Benefit from Recurring Monitoring Fees
 - Full Orisec UDL support
- End user Applications (Control Plus & Control Plus 2)
 - Remote Maintenance via Orisec Cloud
 - Engineers App (Coming Soon)

*Excluding CP-10, CK-10, CT-10

Control Plus End User Application

ControlPlus provides the user complete control of their security system, with a simple to operate interface and easy setup.

ControlPlus can be customised with your Company details:

- Your Logo
- Website Address
- Contact Number
