A "user" is anyone with access to the Orchestrate workflow automation tool on cloud service — authorized users. This includes administrators and workflow administrators who have access to the service. Users in your account are tracked on the Admin tab of the portal. Administrators can create rule-based, automated workflows between their technology sleeves to enhance efficiency as well as improve response times, effectiveness and overall safety.

Orchestrate was developed to be intuitive and consumer-friendly with a simple drag-and-drop user interface. This allows a user to simply set up workflows to address their situation and policies. A user is someone who understands the Safety Reimagined environment workflows, the policies and governance of the workflows, and understands the operations of the workflows. Orchestrate's ease of use allows security operators to build and maintain workflows themselves, without requiring IT department support.

HOW IS ORCHESTRATE DIFFERENT FROM COMPETITIVE PRODUCTS?

Orchestrate delivers the power of true integration through the Motorola Solutions' technology ecosystem. Unlike competitors' products, Orchestrate's powerful platform integrates Motorola Solutions' MOTOTRBO radio system, WAVE PTX connectivity, Avigilon and Vigilant security camera systems, access control and analytics and Ally incident and records management software suite.
