

Built for speed

Introducing **SecureHub**, the latest innovation from **HKC**

SecureHub is a step forward in alarm panel design.

Wirelessly managing up to 70 sensors, sounders or controls with up to 32 users - suitable for any domestic or small commercial application

SecureHub can be installed anywhere in the premises, connecting to our ultrafast SecureComm cloud via WiFi, 4G/LTE or LAN and controlled via the SecureComm App or SmartLink, our engineer software.

Whats more, because of the fully wireless set-up and simple, intuitive controls, installation becomes much quicker than traditional alarm systems.

SecureHub comes with a wireless capacitive touch screen keypad which can be used to arm and disarm the system and access the manager menus for a fast and easy set-up.

SecureHub is an alarm panel truly designed for today's security professional.
