

Alta Flex Camera

Cost-effective, cloud-based flexibility

Deploy smart, enterprise-grade security with the AI-powered Avigilon Flex camera. It's an affordable and easy-to-install solution, perfect for small businesses and distributed sites. The camera's discreet design features an adjustable ball joint for flexible coverage.

See and understand more

Utilize image recognition and machine learning to detect anomalies in real-time, allowing for proactive notifications before issues escalate.

Identify critical sounds

Enhance your situational awareness with built-in audio analytics that expand your security coverage beyond the visual range.

Understand sensory insights

Integrated image, audio and environmental sensors to improve indoor spaces, protect equipment and reduce the loss of goods.

Install virtually anywhere

Simplify installation with a simple plug-and-play setup that eliminates pre-configuration and offers wireless connectivity. Quickly onboard the camera to Alta Video by scanning a QR code.

Access from anywhere, securely

Manage and view your cameras easily at any time using the Alta Video platform. Stay up-to-date with automatic firmware updates and reduce the need for maintenance.
